Closing The Achievement Gap

PCM Associates are experts in the crucial areas facing today's professional educators. We listen, observe and review data while understanding the constraints facing those empowered to design and implement improvement plans.

The Essential Questions

1. How are teachers empowered to innovate and engage students in their own learning?
2. How are students evaluated and supported through scheduling and personalized programs?
3. How are parents engaged in the improvement process and their child's progress?
4. How can school culture be re-tooled to support achievement and equity?

The Big Picture

Our experts can provide a complimentary on-site consultation. Since we are a team, we can provide comprehensive services to students, professional staff, and parents. Through our efforts, all stakeholders learn to see the big picture and can work collaboratively to create a student-centered learning community.

Customized Planning

No two schools are the same. Our team's experience in large and small urban schools informs our unique ability to provide each school with a customized program of services suited to its targeted needs..... all within a set budget. Our services are designed to meet each school's specific improvement plan including:

- Training students and staff leaders on the primary, middle, intermediate, and secondary level
- Engaging students and staff through a constructivist approach to teaching
- Training teachers in innovative instructional strategies
- Supporting parents to value student progress
- Integrating literacy skills across the curriculum
